Lakeshore is dedicated to creating innovative educational materials that spark young imaginations, instill a sense of wonder and foster a lifelong love of learning. With materials for infants & toddlers through the 6th grade, we help children reach developmental milestones and achieve educational goals—while still having fun! We know that each child is unique, and we strive to develop materials that appeal to children of all interests, backgrounds and abilities. And, of course, all of the products we carry must meet stringent quality & safety standards—so they're strong enough for daily use in the classroom and safe enough for use by babies and children.

Lakeshore has been developing innovative products since 1988. Our developers take Lakeshore products from ideas to realities—from first sketches and 3-D simulations to rigorous testing and classroom use. To ensure quality and safety, every product we carry undergoes an average of more than one hundred hours of development and testing before it reaches our customers.

Over the years, Lakeshore has been able to achieve a great deal. But when we join forces with others, the results are truly something.

Because of our collaborations with nonprofits and other important players in the field of education, we have been able to affect the lives of millions. See some of the exciting work we've been doing in the community, and check out our partnerships page for a list of organizations we're proud to call our friends.
